

SPLIT SYSTEMS

MEGA STANDARD SINGLE ZONE INVERTER

LG's new line of heat pump duct-free split products. Mega (HEV series) systems are available in 9,000, 12,000, 18,000, and 24,000 Btu/h capacities. Mega 115V (HXV series) systems are available in 9,000 and 12,000 Btu/h capacities. These single-zone systems feature energy-saving Inverter (variable-speed compressor) technology and are controlled through a standard wireless remote.

STANDARD SPLIT SYSTEMS

Standard Single Zone Inverter systems include advanced technology for cost-effective, energy efficient operation. Available in heat pump configurations with 30,000 and 36,000 Btu/h capacities. Designed with enough capacity to comfortably condition large rooms, the Inverter (variable-speed compressor) technology in these heat-pump duct-free systems ensures that optimum temperatures are maintained.

HIGH-EFFICIENCY STANDARD SINGLE ZONE INVERTER

LG's most energy-efficient line of heat pump duct-free products. All systems in the duct-free high-efficiency line achieve Energy Star qualifications. The single zone systems feature energy-saving Inverter (variable-speed compressor) technology and can be controlled through a standard wireless remote or an optional wired wall controller.

PTAC

When guests are provided with a truly quiet, comfortable room, lodging facilities are rewarded with increased guest satisfaction. The best way to assure that is with LG's new line of energy efficient and quiet PTAC products. They provide an extremely low decibel level and an outstanding sound rating with a soothing tone. Plus, LG models have an efficiency rating up to 13.3 EER, which translates into energy savings.
